

SAFECode

What's New This Month: April 2021

New Blog: How Agile Is Your Cryptographic Strategy?

We have added a new blog to our Post Quantum Crypto series. In this blog we explore what organizations can do today to make these frequent cryptographic transitions easier to handle by applying Crypto (graphic) Agility concepts. Embracing Crypto Agility also brings more immediate benefits to organizations by providing a framework to manage cryptographic changes in an agile manner.

OSSF Webinar Recording

SAFECode has been a member of the Open Source Security Foundation (OpenSSF) since it was established in August 2020. We recently joined forces on a webinar, "SAFECode and OpenSSF: Collaborating to Secure the Open Source Ecosystem". Be sure to watch the webinar to learn how you can contribute and benefit from this association.

Volunteer Opportunities:

[Learn more about this opportunity](#)

Code Integrity: Best practices for protecting source code and build systems.

Recent attacks against SolarWinds or ASUS show that a secure development lifecycle along is not sufficient to prevent code from being exploited. Technology vendors also need to employ best practices to ensure that malicious code is not being inserted in the code they create for their customers. The goal of the working group is to discuss best practices to ensure code integrity during the code development or delivery process.

The first meeting will be taking place on May 5th at 12pm EDT.

The Benefits of Being a SAFECode Volunteer

- Participate in shaping the content of SAFECode publications
- Give back to the community by sharing your knowledge
- Improve the quality of blogs, papers, trainings, and more
- Change the World!

What do I do next? Let us know you'd like to get involved by [signing up here](#). You can also forward this request to colleagues in your company that are experts in any of these areas.

Projects in Flight

DevSecOps

SAFECode's partnership with CSA to create a comprehensive software development and security management lifecycle that leverages components of DevSecOps and Security Champions.

Open Source Security Foundation

SAFECode is a member of the OSSF under the Linux Foundation.

OSSF Working Group

This group will help to shape how SAFECode will continue to contribute to the OSSF's work.

Post Quantum Crypto

This working group is focused on the implications of post-quantum algorithms for developers and offers guidance on preparing for a smooth transition.

Code Integrity

The goal of the working group is to discuss best practices to ensure code integrity during the code development or delivery process.

Tying Security to Risk

Many security program managers and leaders are unclear on the business value they provide to their organizations.

"Best Practices"

Now that Worst Practices have come to a close, we're moving to morph the group to BEST practices. More information to follow.
