What's New This Month: February 2021

SAFECode Day
In case you missed it: to show our sincere thanks to all of our members and celebrate our successes in 2020, we’d love to host you and your colleagues for our first-ever SAFECode Day on February 25!
We have a list of the agenda, which can be viewed here. In addition, we’ll be featuring a special conversation with industry leader Tony Sager, Senior Vice President and Chief Evangelist, CIS. So, is a conversation in the time of the public interest nonprofits and the benefits of the partnership between CIS and SAFECode!
You can learn more about this opportunity here.

New Member: Imperva
SAFECode is very pleased to announce that we have a new member! Imperva protects the data of over 6,200 customers from cyber attacks through all stages of their digital transformation.

Help Us Change the World!
SAFECode Opportunity: Security Trainings
The Security Trainings Working Group is putting together a series of 5-8 minute trainings on several topics. The two currently being worked on are Threat Modeling and Cryptography.

SAFECode Opportunity: Open Source Security Foundation
SAFECode is partnering with the Open Source Security Foundation. We are looking for a group to create a problem statement and a list of topics for interested members to explore.

The Benefits of Being a SAFECode Volunteer
Participate in shaping the content of SAFECode publications
Give back to the community by sharing your knowledge
Improve the quality of blogs, papers, trainings, and more
Change the World!

What do I do next?
Let us know you’d like to get involved by signing up here. You can also forward this request to colleagues in your company that are experts in any of these areas.

Projects in Flight
- **DevSecOps**
  SAFECode’s partnership with CSA to create a comprehensive software development and security management lifecycle that leverages components of DevSecOps and Security Champions.
- **Open Source Security Foundation**
  SAFECode is a member of the OSSF under the Linux Foundation.
- **OSSF Working Group**
  This group will help to shape how SAFECode will continue to contribute to the OSSF’s work.
- **Post Quantum Crypto**
  This working group is focused on the implications of post-quantum algorithms for developers and offers guidance on preparing for a smooth transition.
- **SAFECode’s Security Trainings**
  This group identifies existing training that need to be updated and create targeted training to be relevant to the industry and training best practices.
- **Security Trainings Environment Best Practices**
  This group seeks to provide insights on what is required to run an effective learning program.
- **Tying Security to Risk**
  Many security program managers and leaders are unclear on the business value they provide to their organizations.

"Best Practices"
Now that Worst Practices have come to a close, we’re moving to morph the group to BEST practices. More information to follow.

I want to participate
